

## *Helping Our Youth Develop Communication Skills For The Future*

*This website is dedicated to the radio operations of the W7MHM radio club that works in association with the Military Heritage Museum located in downtown Punta Gorda, Florida.*

*This is one of the more popular destinations for locals and tourists in the area. The radio club provides live radio demonstrations at the Museum and offers youths the opportunity to speak on ham radio at least once a week. The radio club works closely with the Museum management to provide a unique experience for the students who come through the museum.*

*The radio club is equipped with many types of radio equipment that cover quite a few amateur radio bands so we can demonstrate everything from short-distance FM radios, long-distance digital radios, and long-distance HF radios.*

*The members of the W7MHM club are all licensed HAM radio volunteers who work at the Museum.*
