Concept Plan:

Each day, anticipate 6-8 kids for 1 hour. Time will be divided with 30 minutes for GOTA and 30 minutes for classroom instruction.

Current plan is to support 3 days per week, maybe up to 4 if enough students sign up.

As some of the kids will have been to previous camps (prior year) and/or will attend multiple camps this year, if possible, I would like to add variety in the GOTA experience. Thoughts include using VHF analog mode, UHF DMR mode, 6 meter, and JS8 Call.

Classroom instruction will vary from week to week as we have up to 6 different modules to choose from.

All radio equipment will be provided by the Military Heritage Museum Amateur Radio Club. Class room equipment (computer/monitor) will be provided by Peace River Radio Association. Hands on lab materials will be provided by the Military Heritage Museum.
